

BRIA installation and configuration for Android systems

INSTALLATION

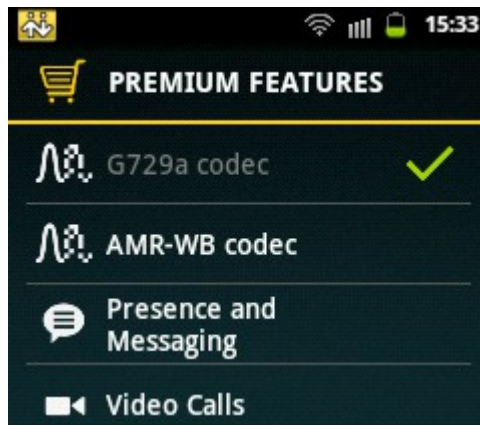

1. Go to Play Store and search for the App BRIA. Follow the instructions for purchase and installation which will appear on the icon.

2. Proceed with the purchase of codec G.729, go to SETTINGS, then Premium Features.

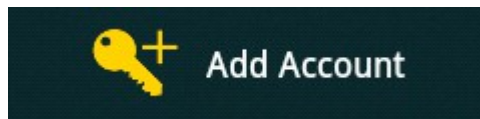

3. Click on G729a codec and purchase. For confirmation “” will appear to the right of codec.

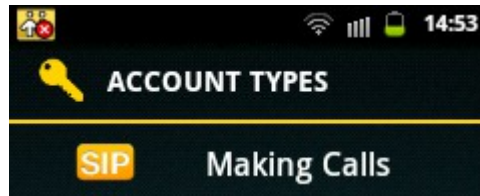

CONFIGURATION

1. Click on the icon BRIA and add a new VoIP account by clicking on "Add Account".

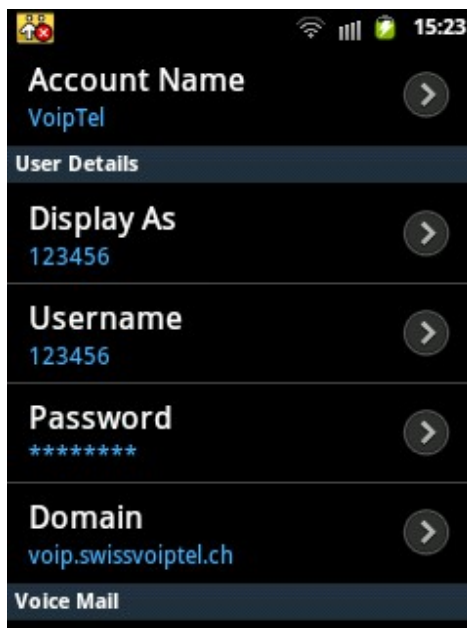

2. Select the account SIP Making Calls

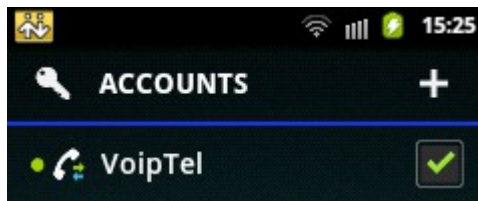

3. Complete the requested information as follows:

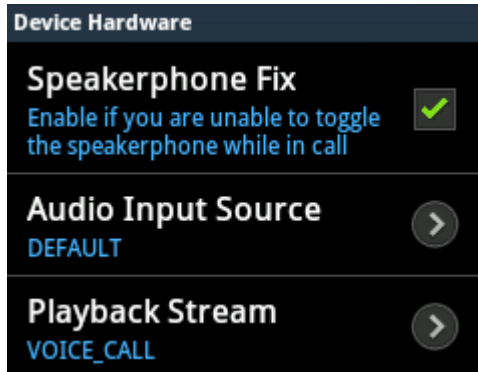

- Account name: VoipTel
- Display As: number of Account Voip or User number Easy-VoipTel
- Username: number of Account Voip or User number Easy-VoipTel
- Password: number of Account Voip or User number Easy-VoipTel
- Domain: www.swissvoiptel.ch or switchboard domain name of Easy-VoipTel
- VM Number: 777.3

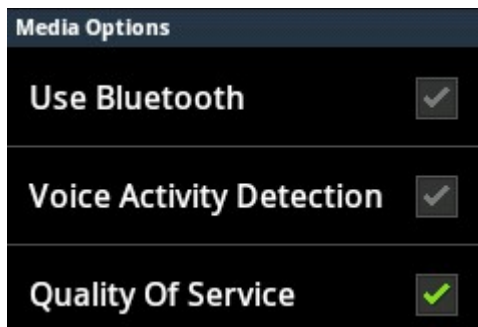

4. As soon as all data has been correctly completed it is possible to return to save all Settings and allow for the registration of the account.

5. Go to Main Menu and select the tab SETTINGS in order to personalize by clicking on Advanced Settings. Go to Speakerphone Fix and click on the box at its side.

6. Verify that Voice Activity Detention is deactivated.
